Rosie the Riveter

Rosie has inspired the nation since 1943. She was an inspiration for women to start working in factories during World War II. While men were fighting, there was no one to work in factories. That's when Rosie came in! She encouraged women to start working in factories and doing things that weren't usually done by women.

Women's Culture

We decided to do a photo booth where girls dressed up to look like Rosie the Riveter. Our goal was to show that diverse women are as strong as men. We had a lot of fun doing this project, and we got to meet many girls from different cultures. We had them write their language down and then we translated "we can do it" in their language. Here is our presentation.

S.T.E.A.M. Students

At school we volunteered to help 5th graders learn about girl power and S.T.E.A.M. We wanted the kids to enjoy and learn about girl power and be inspired to work in technology. S stands for science, T stands for technology, E stands for engineering, A stands for art, and M stands for math. So we centered our activities about S.T.E.A.M. each day of the week was a different letter from S.T.E.A.M. We taught the students about coding, girls throughout our history, different kinds of jobs, how to make different kinds of things, and much more. We also took them on a field trip to Metropolitan Community College. We got to show them a prototype lab. We learned a lot about technology and things like 3D printers, virtual reality, new kinds of robots, and much more. Here are some pictures of the students at the lab.

Why we picked Rosie the Riveter

We picked Rosie the Riveter because we want to inspire women in our generation to do other jobs in the work force beside the main jobs for women, like teachers, nurses etc. We were inspired to do Rosie the Riveter because she inspired many women to join the work force when the men went to World War II. Did you know that 7.25 million women had to go to work during World War II ??? Rosie is a big part in our history and makes a big impact in our world. That is why we picked Rosie the Riveter.

What Girl Power Means To Us

What girl power means to us is that boys and girls are equal, and girls have the right to do anything they want to do. As girls we are powerful, brave, empowering, and inspirational. When we hear girl power we think strong women who are capable of making their dreams come true and doing anything a boy can do.

go-getter innovator risk-taker leader

Women of the Future

In our generation we are trying to get girls to go after their dreams. Like how Rosie inspired many women in our nation. Women don't just need to work in factories, we need them in every field. They are important! They help as much as men help.

Our Team

Our team consists of 1 boy and 3 girls. We all work together, and we all have equal opportunities. Us girls can do the same things Will can. We all build, program, drive and journal. Our team is not really affected by being mostly girls because other powerful and inspiring women made this normal. On our team we have Charlotte(far left), October(second to left), Rachael(second to right), and Will(far right).

Thank You!
