

What Vex means to me

Vex has been a big change to my daily life. It has made me better in math, and everyday it wakes up my brain for the rest of the school day. I've been able to understand more about computers and electronics because of vex. Being able to build robots that could perform different tasks was amazing. Vex has been a wonderful school activity for me. Vex has changed how I thought about electronics and has made me want to learn more. It has been fun, entertaining, and interesting experience working with vex; and I will always want to keep on working with vex for as long as I can.
