CHALLENGE

CROSSOVER

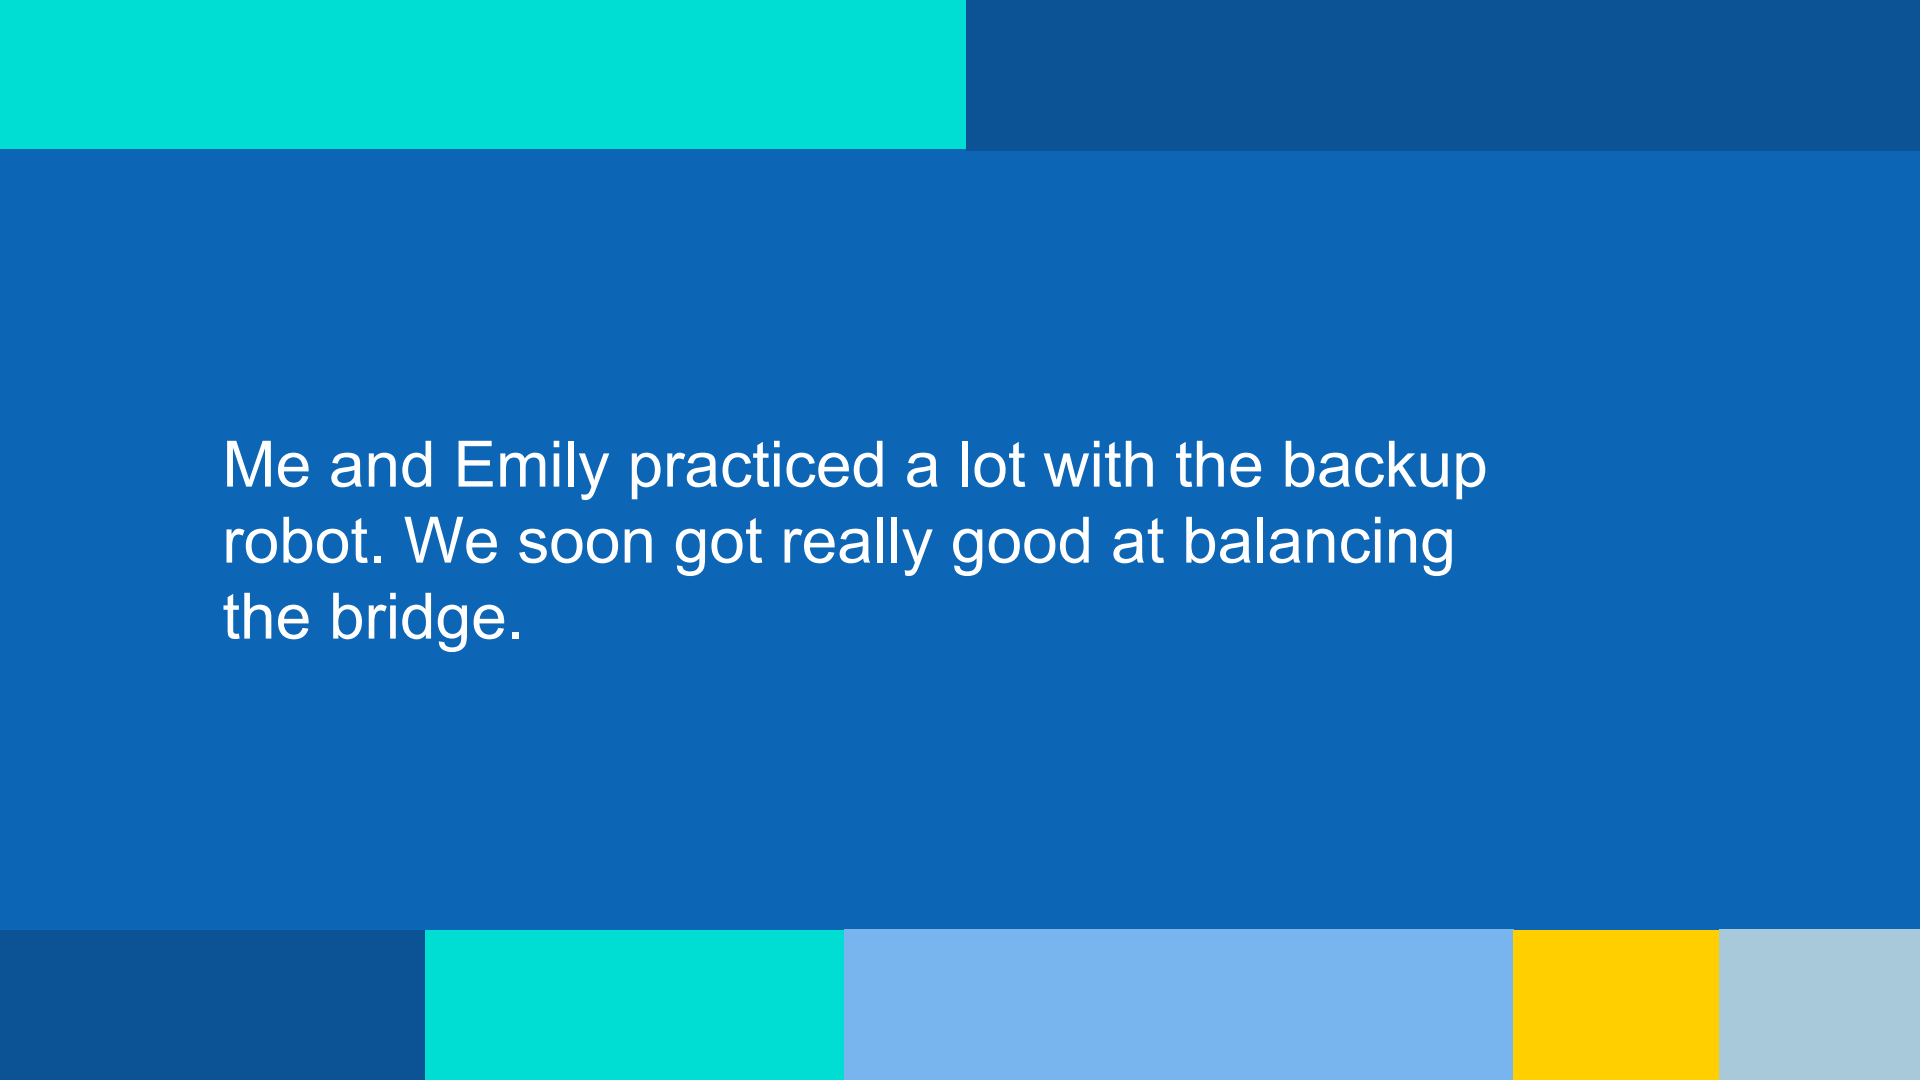

Hi my name is Valerie, I am a 6<sup>th</sup> grader at West Middle School. My teammate Emily is a 7<sup>th</sup> grader. We are on team 1313M the Roborunners.

Me and Emily's first challenge this year was to qualify for states.

My team had 2 robots. A backup robot and a main robot. The main robot was not ready for competitions so my team voted to use our backup robot.

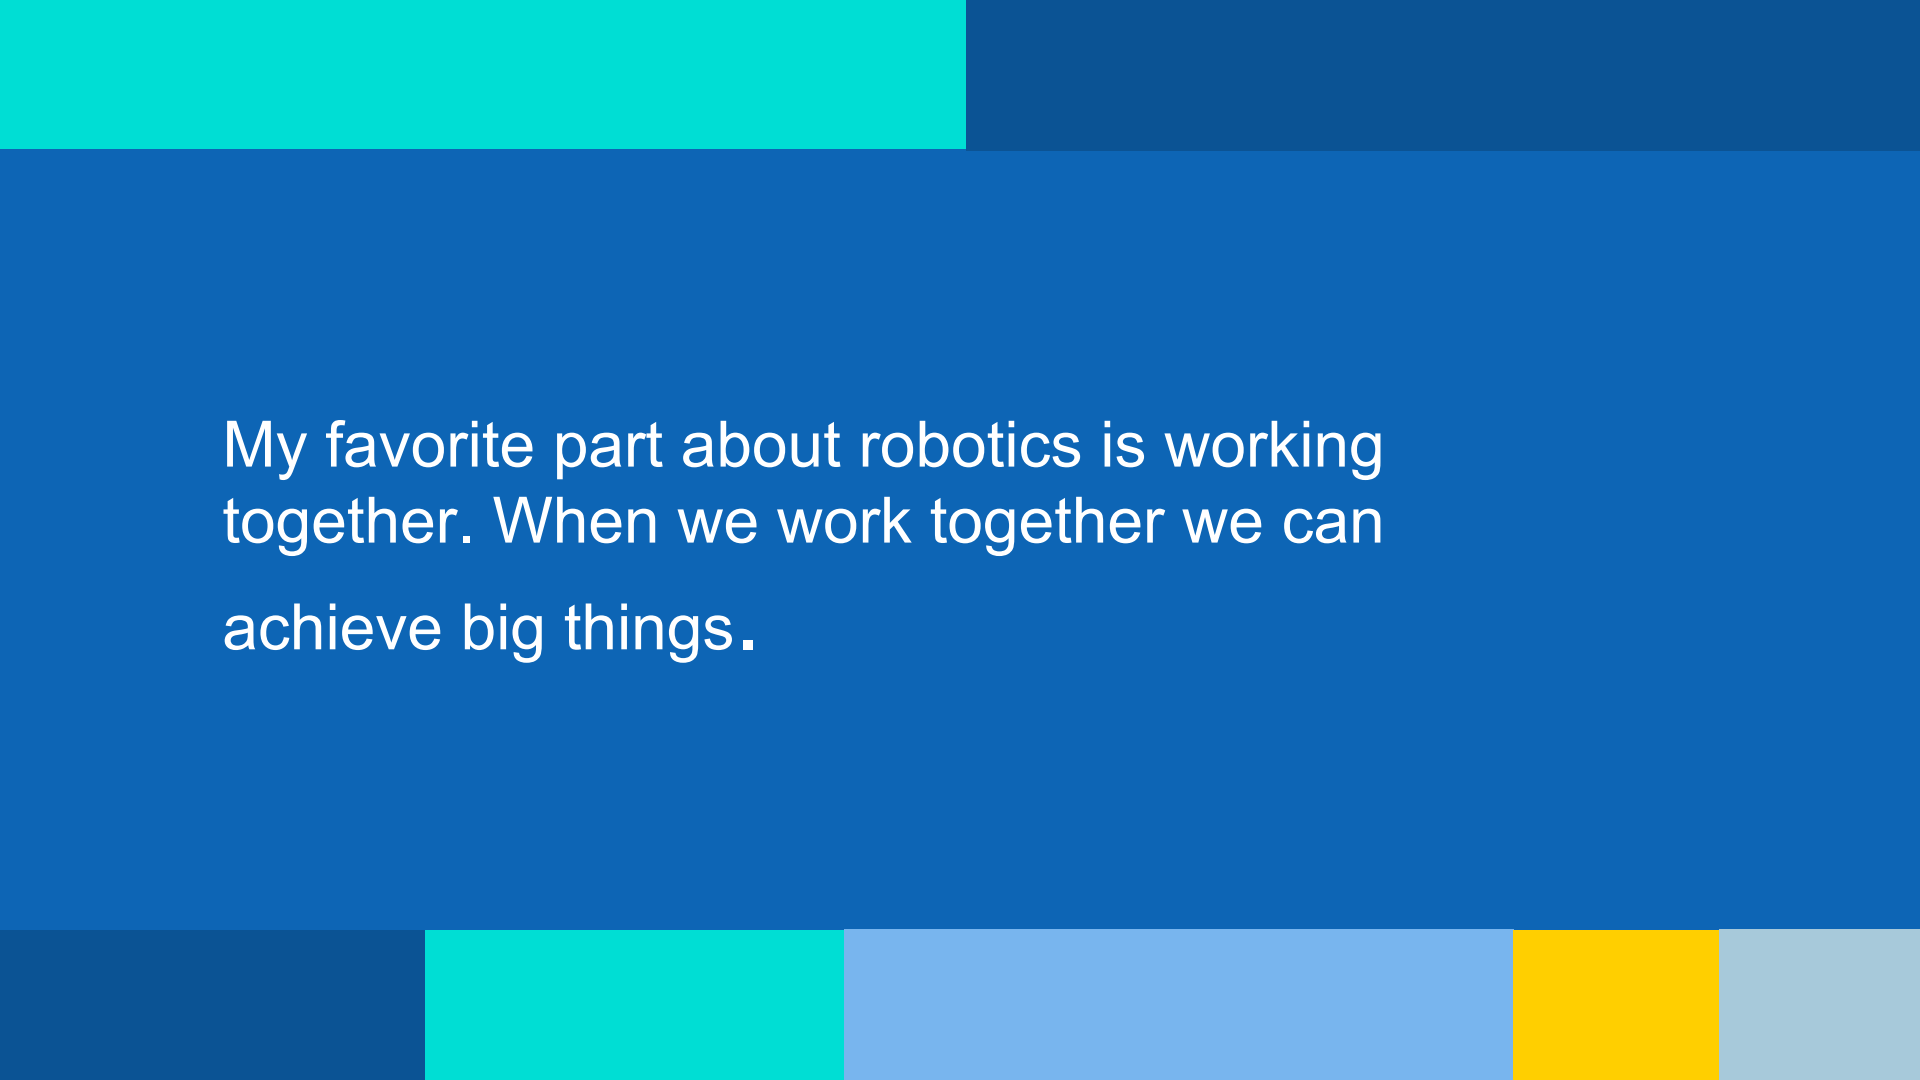

Me and Emily practiced a lot with the backup robot. We soon got really good at balancing the bridge.

My team did really well at our first competition. We made it into the finals. I drove in the finals. I looked for the team we were paired up with so we could practice. I practiced and practiced till my team was queued. All that driving during our practices paid off. My team won teamwork!

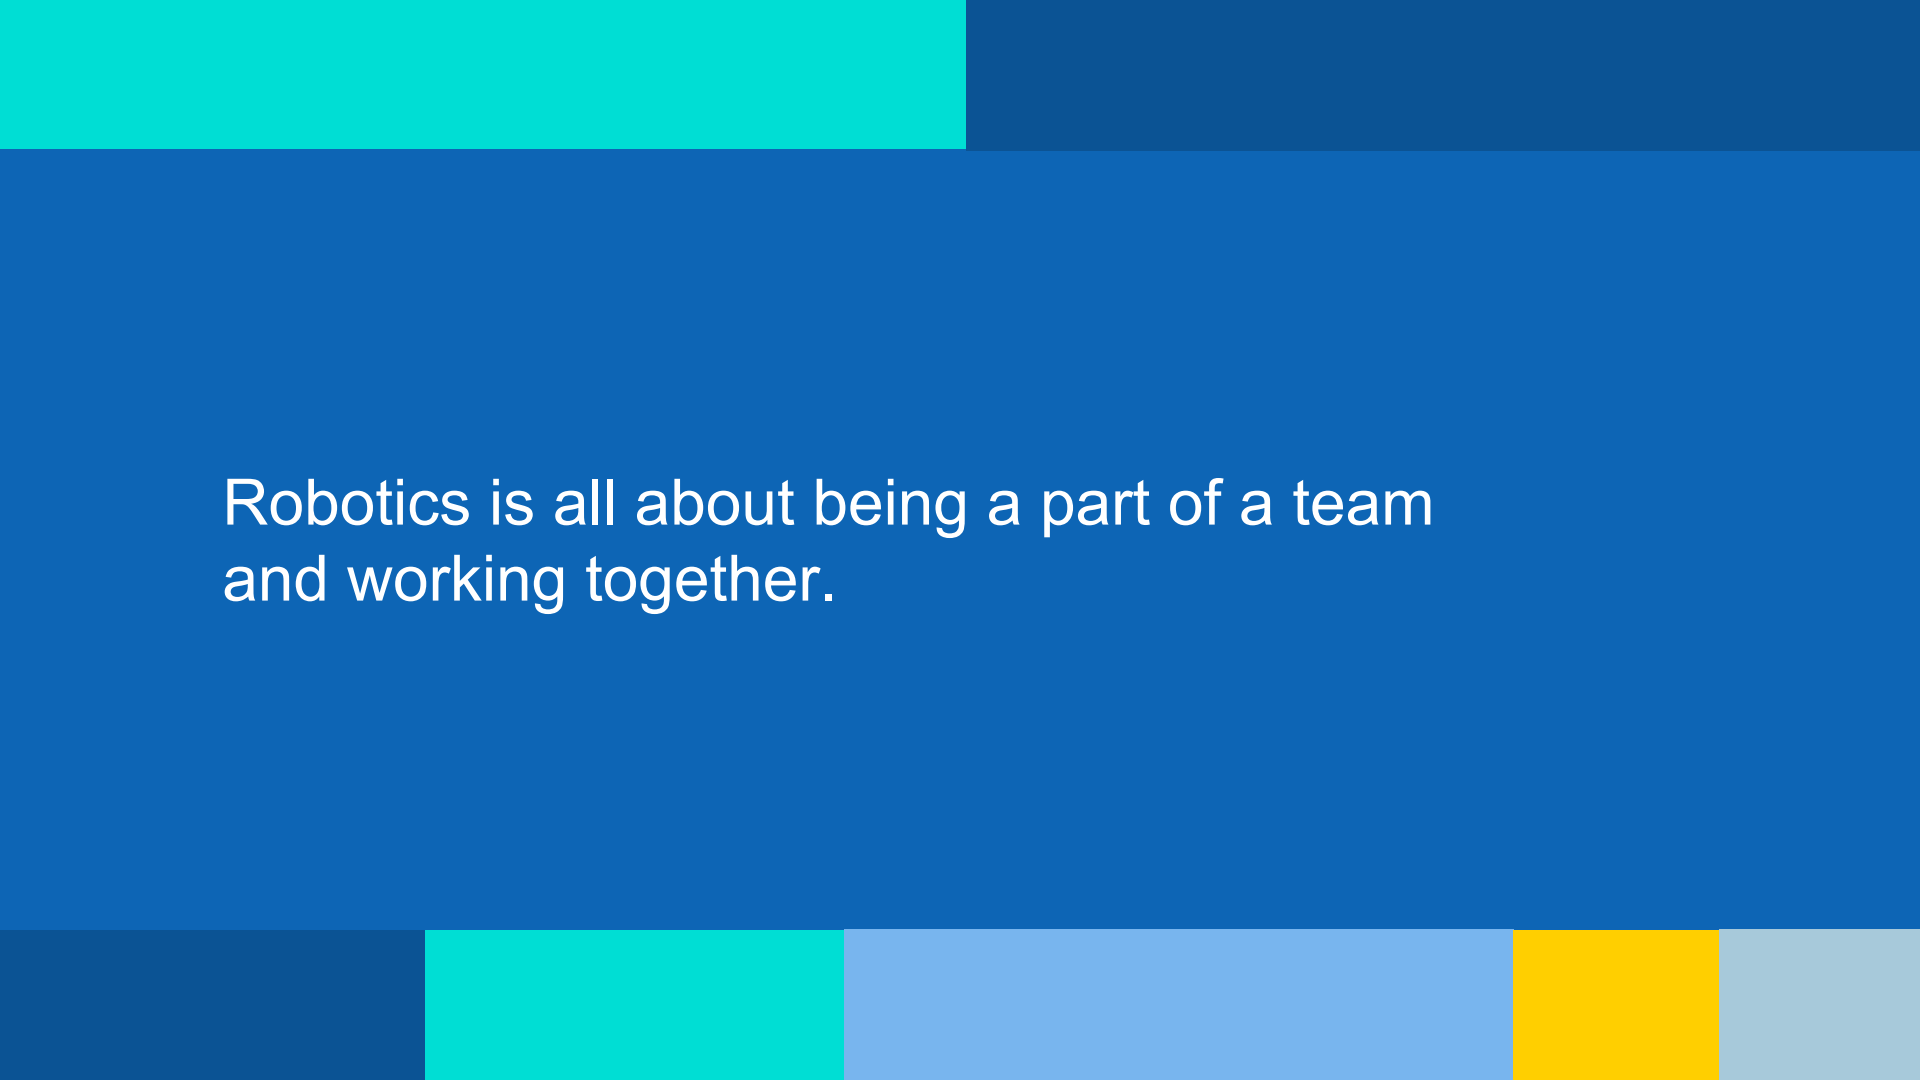

My team won  
teamwork and  
excellence. We  
are on our way to  
states!!!

My favorite part about robotics is working together. When we work together we can achieve big things.

The background features a solid blue field. At the top, there is a horizontal bar with a cyan segment on the left and a dark blue segment on the right. At the bottom, there is a horizontal bar with five segments: dark blue, cyan, light blue, yellow, and light grey.

Robotics is all about being a part of a team  
and working together.

Valerie, Emily, Levi, Whitman, and Gabe
