

Once upon a time there was a group of Sweetch princess that lived in a big palace made of gears. Where the girls played with their stars in the field.

One day the girls decided to travel to the greatest competition ever in Kentucky. They packed all their aluminum pieces and stand-offs.

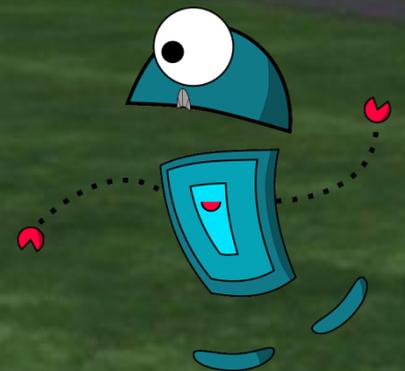

When they arrived to the airport they listened to someone talking to them. When they turned around they noticed that the noise came from A ROBOT!

The robot explained why he was in that state. It was a curse and he went to Kentucky to find someone to help him.

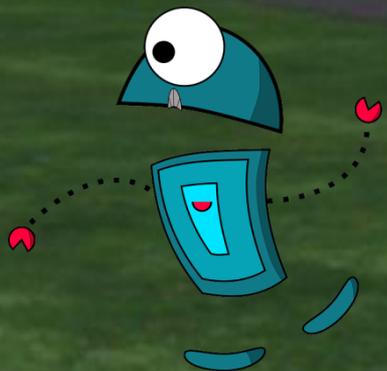

"I was walking in a park when I took a beautiful apple to eat. A witch told me I had taken the prohibited apple and she became a robot"

Suddenly, a fairy appeared.

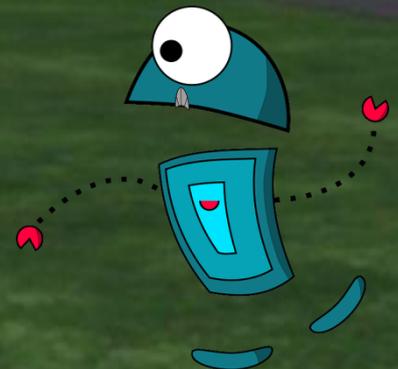

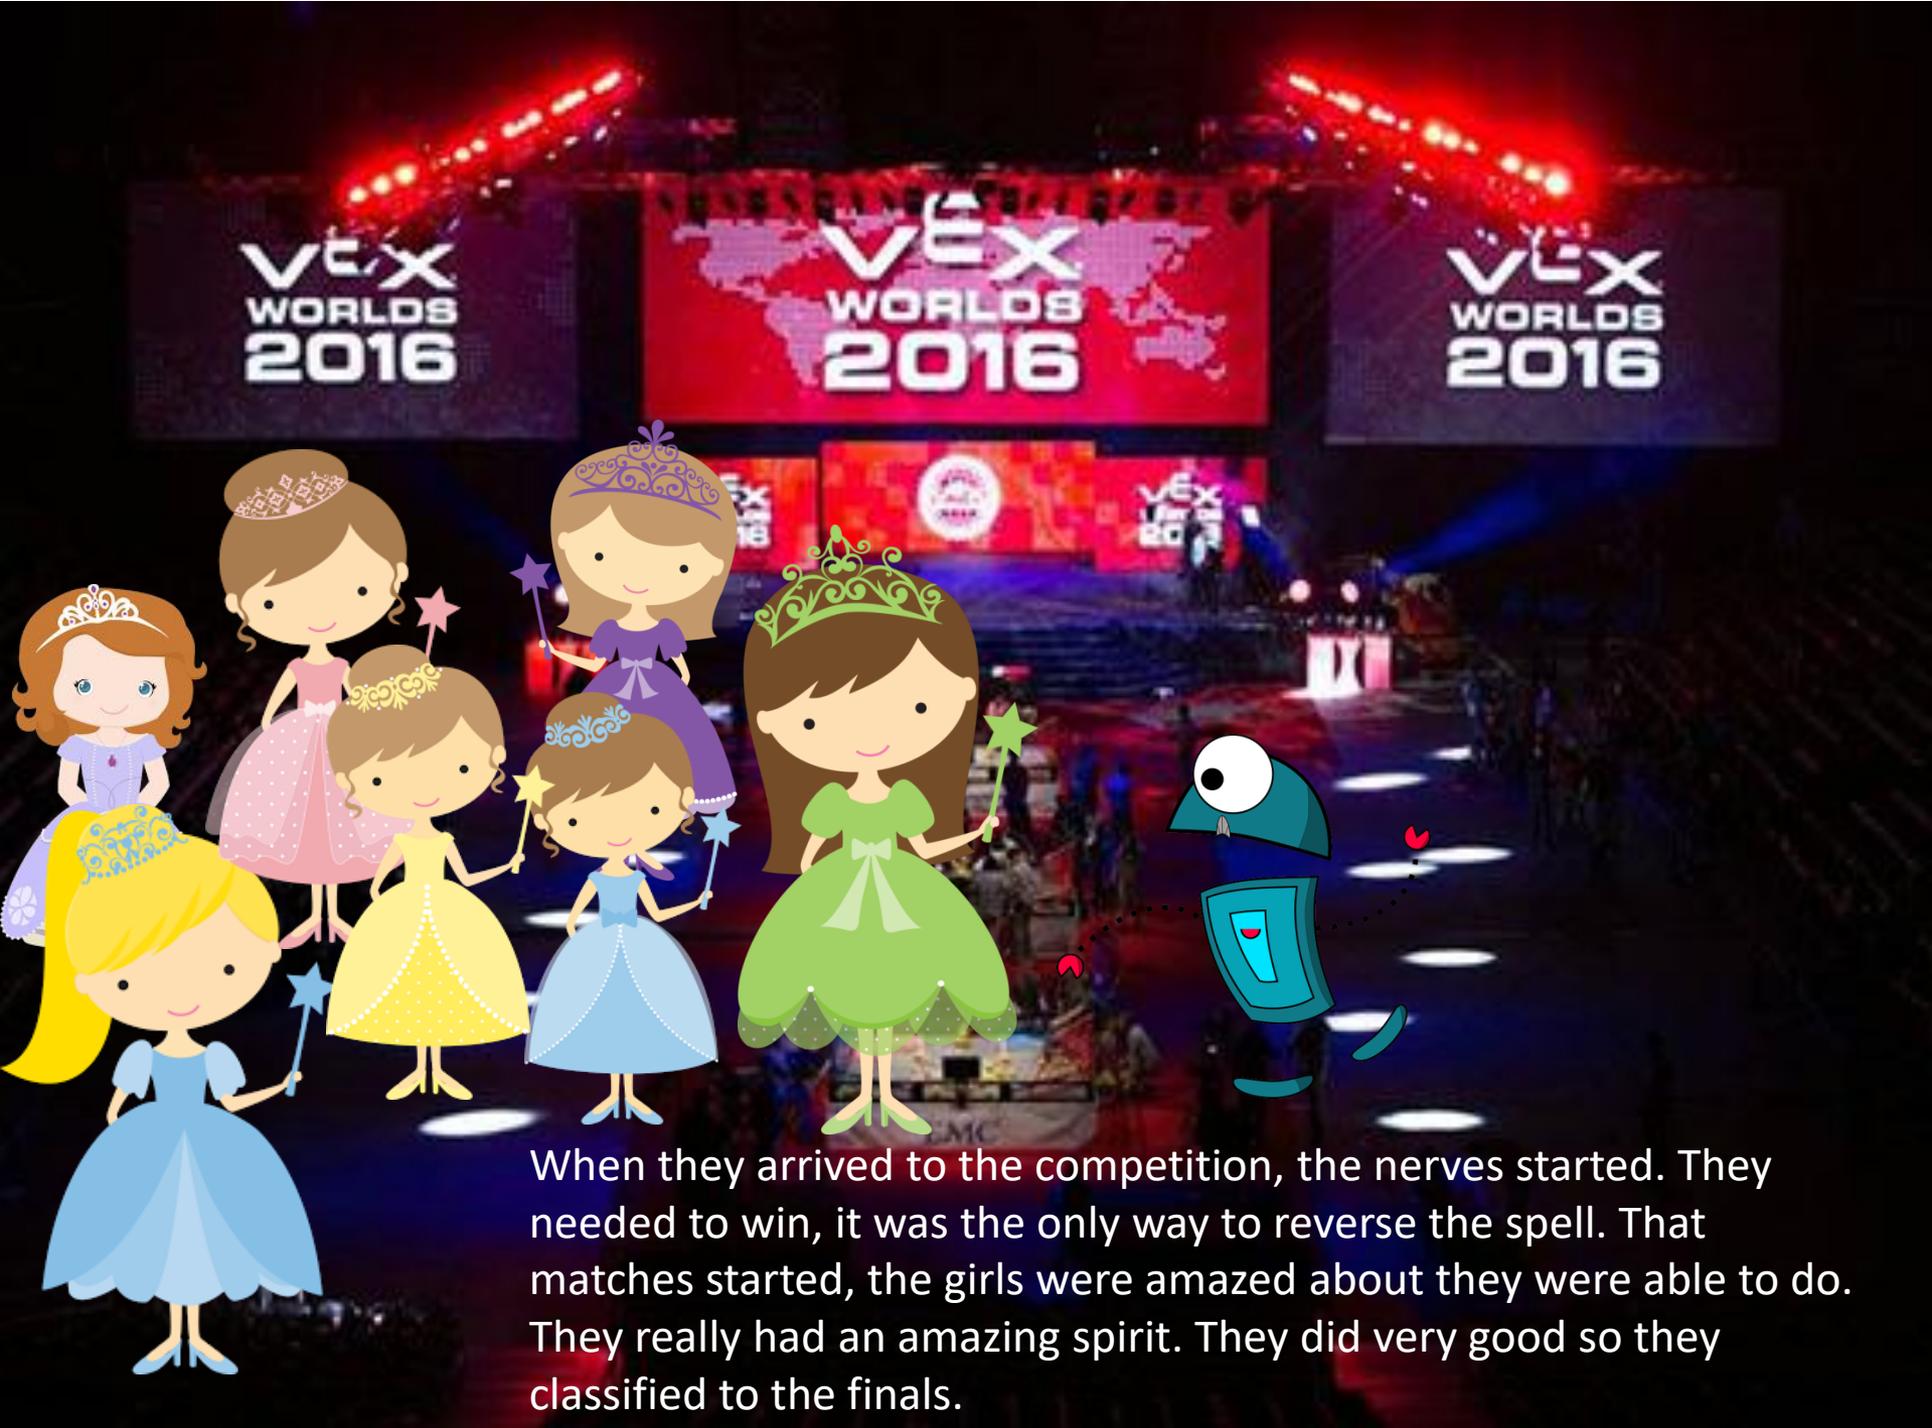

Your robot is under a spell and you need to win a trophy, but remember, you must improve your teamwork

The girls had to get quickly to the competition if they wanted to save their friend.

OMG! We should hurry up

When they arrived to the competition, the nerves started. They needed to win, it was the only way to reverse the spell. That matches started, the girls were amazed about they were able to do. They really had an amazing spirit. They did very good so they classified to the finals.

That was the moment to show the world who they really are. They took the Joystic, the autonomous started and Sweetch won. During the modo driver, all the team was stressed but finally, they did it. They won and they got the trophy.

But, where the
robot is?

There!

We did
it!

Thanks
Sweetch

Finally the Sweetch princess could rescue the prince from the course and also demonstrated they were capable of everything they want. END...
