

We changed our entire robot before our first tournament. Instead of having a slip gear we changed our robot to a DumpBot.

Our First Tournament:

Our first tournament didn't go as we hoped to. We all rode the bus to Collierville, Tennessee. When we got there we helped the school set up. That took a long time! The next day was tournament day. We were ready for it. I was super excited! During the qualification rounds we placed 5th place. We didn't have any real problems. The only small problem was that we added too much weight to the back of our robot. We quickly fixed that. We talked to a team, The Collierville Illuminati and decided to partner with them. They chose us during alliance picking and I was so excited! I was ready, but also very nervous. My excitement quickly faded when we lost in the quarterfinals. We were excited for the two teams who won the tournament from our school though.
