

We decided to change our robot to make it smaller, lighter and able to climb. It didn't work though so we took that one apart and used our old one. The next tournament was another practice tournament in Ohio. And it was by far my favorite!

My 4th Tournament In Ohio:

I knew this would be my favorite tournament because it was inside a resort and we got free passes to the largest indoor water park in the world. I scouted a lot and talked to many teams who looked like competition. We were killer in that tournament! There were many teams and we had 8 games. We won the first seven games and I wondered if we would go undefeated. We were in first place but lost our last qualification match and got knocked down to fifth place.

This ruined our plans but we still got teamed with 2 great teams. We made it to the championship but lost the first two games. We got runners up and middle school excellence! I was still exited!
