

1. First I decided to make an object out of a Vex starstruck cube, because it was the one thing I had an abundance of. Then I thought of things that I could make with either one or more cubes. One of the things that stood out to me was a shopping bag. Since 2016 most stores in LA stopped handing out free plastic bags, and offered shopping bags but the one thing was that they weren't free. So I decided that it would be interesting to make a shopping bag from a vex cube.

2. Secondly I planned out how I would make a shopping bag. I decided to cut off the top cover of the cube and started taking out the foam inside. Then I realized that I could make the handles out of the fabric left from the top cover of the bag. I sewed together strips of cloth to make the handles and then sewed them onto the bag itself and I proceeded to test out the functionality of the shopping bag and it works pretty nicely.
