

Team In The Zone Lancers

#6986C

Photography Challenge 2018

Lancers Robotics Team 6986C Accomplishments

The picture was taken after our robot was completed and demonstrates our strong teamwork, creativity, organization and enthusiasm. All members were intrigued and contributed to the process of building the robot. The expertise of each member has contributed to the team's success. Each part of the robot was painstakingly constructed and assembled from many parts, such as c-channels, axels, screws, collars, nuts, gears, spacers, etc. The accomplishment of building our robot has shown our team spirit which we define as solidarity, mutual assistance and striving for a common goal. We are all proud to be members of "Team 6986C".
