

Girl

TURNING THE INEXPLICABLE

(A GIRL POWERED STORY MADE BY BOYS? MEANT FOR
GIRLS)

Powered

WHY ARE WE DOING THIS.

- For starters, We are 1073D a VEX VRC (MS) team from R. M. MARRS Magnet Center in our hometown Omaha, NE. Just saying we are all boys? I know what you might think a boys team do a Girl Powered challenge, we will tell you why? At the starter of the year of robotics we had 5 boys & one girl called Malia we thought that she will be horrible at everything in robotics. Then, Malia she switched teams cause she was class only we were left speechless. After that we thought that no girl we're weak, they are way more stronger & powerful than boys. Us 1073D thought that are girls are the future leaders. Girls can be more powerful than boys (We are not saying one gender is better no, both are equal it all depends)that's we are doing this challenge. 1073D OPS- E-LEMON-ATORS will show you & tell you what Girl Powered is what supposed to mean in not only VEX Robotics, in the whole world!
- "Where Your Future Begins..." - R. M. MARRS

FIRST OF ALL, WHAT IS GIRL POWERED?

- The Robotics Education and Competition which is known as REC foundation and as VEX Robotics they both collaborate to help defeating this world full of diverse that currently we live in, at this very moment and you know what? Were gonna make it leave it in the past but it takes more than just them. We us 1073D we will help commit a difference showcasing the enthusiasm that STEM both in VEX (EDR) & VEX (IQ) that woman can change the world they just have put the confidence in mind, success is not a dream, it can go so flourish, they just need to achieve the Undefined..... cause who run the world GIRLS! Were not saying that females are better than boys that's just not right were trying to be equal. What were trying to say is that girls when they join robotics than can make a difference today in the present and the future!

The logo features the letters 'G' and 'P' in a bold, sans-serif font. The 'G' is light blue, and the 'P' is magenta. A magenta lightning bolt with a blue outline is positioned between the two letters. The entire logo is set against a dark blue background with faint, stylized circular patterns and a grid of small white dots.

JUST LETTING YOU KNOW.....

- As in the title it might not seem so attractive as it looks cause it is true that males take every position in a job, its rare that you see woman working and if they do there are force to do more work at a low pay, then men its not a struggle for them. The same thing is in VEX robotics cause girls only take up 23% of VEX participants, that's not it there's more. Women only represent 24% from the STEM workforce. Well humanity (mostly men, not all) think "girls don't like that stuff" they need to understand that it's false. Recent studies that have happened in the present both girls and boys have an identical interest in science and math in elementary school, and they also appear that girls no longer have this attentiveness in middle school for a many of reasons.

ARE YOU READY?

- Get ready for the.....
R. M. MARRS
Robotics 1073 **VRC**
Girl powered teams!

1073A OPS- PLAN B

VEX VRC (MS)

- 1073A Is a MARRS Robotics (MS) team that is only about 8th graders. This year, this team in our Annual Robotics tournament on 11/03/18 they won the Design award! Also, on 12/15/18 in the North high school tournament they celebrated with cheer their 2nd award..... Judges award! First, all of the teammates are: Pablo Torres, Dayanara Nambo, Shania Orozco, Ashlee Patino, Andres Lopez, Eli Varguez & Andrew Bailey yeah there's boys too. How did they manage to win these awards? "We just don't over think that much"- 1073A team. What does Girl powered mean for your team? "It means a lot, cause we were only girls but we let the boys in & we have a exploratory based off of it." - 1073A team. How do the girls in this team take a big role in this? "So Ashlee is one of our builder, Dayanara does journaling & Shania does as well!"- 1073A team.

1073G OPS- CHICKEN NUGGETS

VEX VRC (MS)

- 1073G Is also a MARRS Robotics (MS) team, but they have something different then any team not only in the school in our whole state (Well that's what we think!?)! This team is the most motivational, caring & special group we know. On our Annual Robotics tournament on 11/03/18 they participated in the tournament. True. You might think they won an award yeah but the highest & best award yet the Excellence award. Who are these wonderful people? They are Diego Martinez Gutierrez, Emily Sanchez, Leilani Hiatt, Tallulah Magaña, Fernando Rodriguez-Serrano & Zander Kochen and they are all 7th graders! How do the girls in this team take a big role in this? "They help improve the citizenship in our team."- 1073G team. What does Girl Powered mean for your team? "It means that girls have a power or right that no one can control!"-1073G team.

ALWAYS REMEMBER...

- That no girl should be judged in a wrong manner, that there no smarter than a boy or somewhat. Let me tell you something only that someone criticizes you there wrong. They don't know how capable you are the strong, smart, capable & potential you can be! Show what you can be & demonstrate it to the world, cause we're all Girl Powered even boys too. Otherwise, Us Boys we need to know that we are doing is wrong, let's forget about the past but we can change our change our future all of us (Boys and Girls) united together.
- "Think like a queen. A queen is not afraid to fail. Failure is another steppingstone to greatness." -
Oprah Winfrey

WE WILL LOVE TO GIVE THANKS TO...

- Girl Powered- <https://www.girlpowered.com> for not only helping out with this PowerPoint & for making women change the world.
- R. M. **MARRS** Robotics- <https://marrs.ops.org> for help giving the chance to girls in VEX (**IQ**) & VEX (**VRC**), for them to have a future.
- Brought to you by 1073D. Teammates: Angel Reyna-Ramirez, Edgar Del Cid Lutin, John Barrientos, Jasen Cruz-Espinosa & Jendrick Hernandez.
- Title: Turning the undefined Team: 1073D Entrant: Edgar Del Cid Lutin. We know that there is only 2 Girl **Powered** teams but trust me, there will be more teams **Girls** can do the same thing as **Boys!**
- Thank You, also remember girls to show that Girl Powered you have in you, and show it to the **WORLD!**
