

Towards the end of Grade 11, Crystal, Sylvia, and our teacher advisor approached Nadia and asked her if she was interested in being a lead programmer on an all girls team. Her future team Captains explained that they noticed that many girls would initially join, but later felt too intimidated to learn and felt unheard when sharing their ideas. The purpose of the all girls team was to provide a comfortable environment for girls to try new things and express themselves without judgement. This season didn't seem as dark and gloomy.
