

Hi! We are the **GalaxyBots** - Morgan, Trudie, and Nola. We are three energetic third graders from Oak Grove Lower Elementary School in Hattiesburg, MS. We all are individually involved in different activities (dance, Girl Scouts, and piano), but together we share a love for robotics. Nola is new to robotics, and Morgan and Trudie are returning for their second year. We work and play together to build, design, program, journal, practice and compete with our robot, the Clutch. Our robot is unique because we designed and modified a different claw. While working together, our diva personalities came out, and we created the phrase **#Engineeringdivas**. We invite you to journey along with us into our *Galaxy* and explore the world of VEX IQ!
