HALO

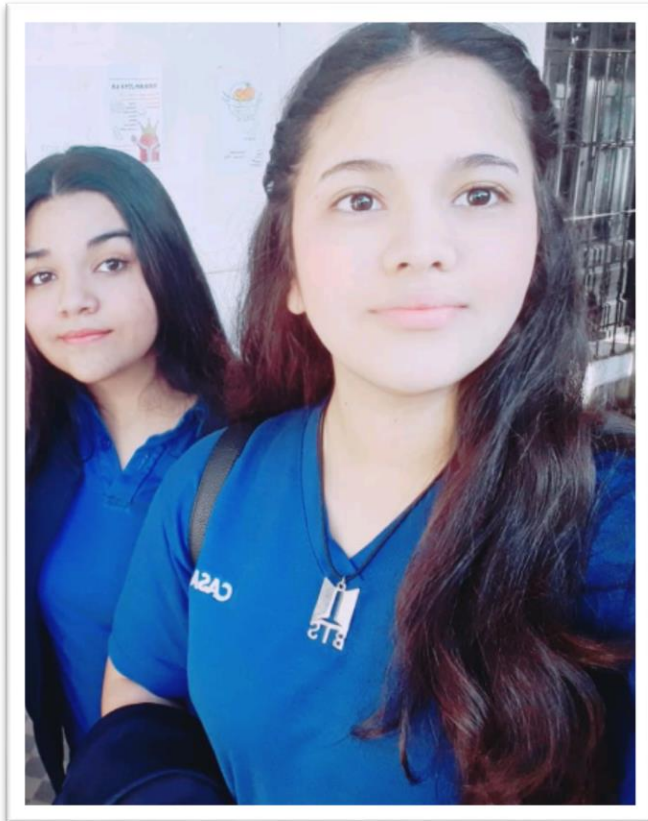

Women's empowerment may already sound common to developed countries, where the cause is advancing every day, but there are still places in the world where women live in the shadow of men.

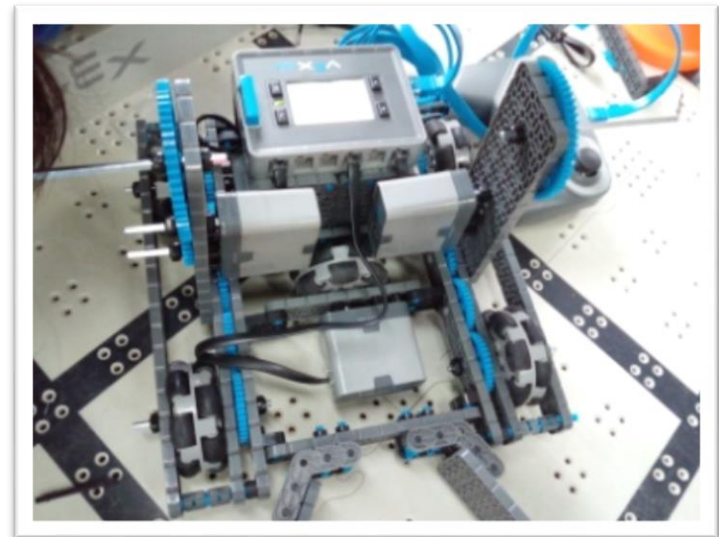

Some time ago it was foolish for the woman to be more than a housewife, who should only take care of pleasing her husband and caring for her children. Not long ago it was ridiculous that there was a **woman driver, pilot** or a **female soccer player, an independent woman, capable of being a leader, an entrepreneur,** the one who wears the pants of the house and maintains it, who **does not need a man to be a mother** and who **alone puts the world at her feet.**

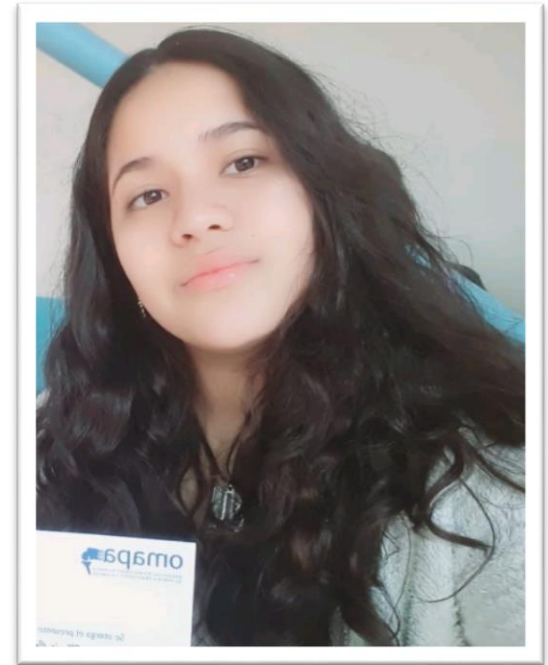

We are GIRL POWERED!!

Hi... We are powered girls and the team 11791C HALO of the Colegio Benigno Gabriel Casaccia Bibolini, located in the city of Areguá, Paraguay.

My name is **Dahiana María Colman Benítez**, I am a student of the Gabriel Casaccia school, I am passionate about **Taekwon-do** and **Robotics**, It's my way of clearing myself.

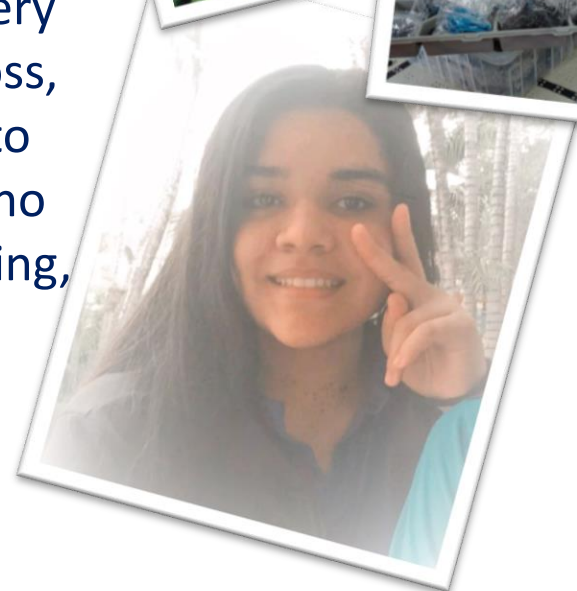

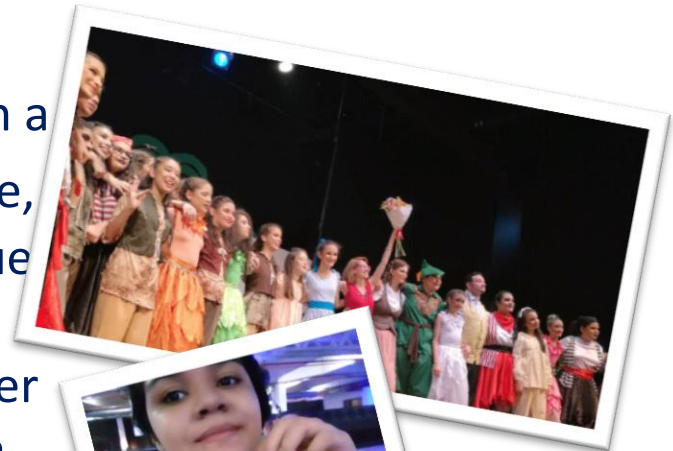

From a young age I realized the macho culture, moreover, I think that Robotics and Taekwon-do were classified as "Sports for men", but little by little that was, it goes and will change.

My roles in the team are the **engineering book writer**, **3D designer** and **driver**.

My name is **Bianca Beatriz Vázquez Piris**. I am a **Dancer, Actress** and **Student**, I love Science, Mathematics and Music, well, I really love, value and admire Art in general. Robotics for me is more than just work, science, hobby or whatever you want to call it, Robotics is a passion, it is a lifestyle. It is an opportunity to enjoy, enrich ourselves and show ourselves and the world the ability that we have to be more awesome every day, that no matter the challenge that we cross, with the difficulties and limits, we are able to overcome them, to take the things that just no longer has a solution and do something amazing, beautiful and unique just like us.

My roles on the team am the **builder**, **programmer** and **driver**.

STEAM role model

ANETT NUMA

Having studied and lived in several countries, she learned to appreciate living in a digital society. Anett believes that all public service processes and structures should be simple and easily accessible to all citizens. Based on its academic record focused on Political Science and Governance, it focuses on fostering good public-private relations and cooperation to create a collaborative environment that helps develop better policies and initiatives.

She is an inspiration to us, for her way of thinking, her actions, her words, and her accomplishments, she calls on us to be able to fight for us every day, others and our dreams. Looking to be helpful and helpful. It's a role model for us !!.

PS: At the campus party Paraguay, we had the great honor of being able to meet her, it was the best experience we could have had.

Especially for me who really is a very important person I have influenced in my life, and obviously I took a picture with my idol,

She really is a very sweet person

Vex IQ challenge creates great inspiration by encouraging technology and its reach to young people.

We believe that robotics has given a radical change to our lives, the knowledge of science and technology that we develop in it, as much as creativity, and above all the dedication and commitment that we put opened many doors.

The Girl Powered campaign inspires women to fight for their dreams, their rights, demonstrating the capacity we possess. We believe that we should start by changing the way we think and see things, and from there achieve the self-overcoming.

“We are GIRL POWERED!!”

Bianca Vazquez y Dahiana Colman
