

The Experience is Everything...

The picture we chose was taken at the state championships located in Maui, HI. This moment of our life really made us think about where we started and where we are all now. The experience from start to finish had really impacted our lives in a big way. We didn't do so well at the start but we learned and improved over time. With dedication and experiences, we did very well in various tournaments including the State Championships. This moment in our lives was a reason why we love robotics to this day.
