

An allusion to a song in the *Hamilton* play, this picture shows where “it happens”. That includes team meetings, working on the engineering notebook, collaborating on *Fusion 360*, or running our autonomous programs. This desk is a constant reminder to past dedication and rewards of VEX robotics, featuring past medals received at *worlds*, pictures of past robots, and other memorabilia. It’s also a motivator for current projects, such as on the left where you can see our ongoing electronics challenge, or the computers which feature our robot on CAD and the newest VEX game *Change Up*.
