Girl Power Pictorial Essay

We present to you girl power! To start off, "Girl of friends that are girls who work together, or when a are demonstrating leadership , others while still being respectful, themselves. The way we we are inside of groups and positive way by showing

"Power" to us means a group team of girls prove a point. They independence by being helpful to cheerful, and loyal to show leadership is when someone is leading in a respect to others, and kindness. Another way we show teamwork is when we have groups and we are helping each other out when its most likely needed. Girl Power is a strong phrase. When we think of girl power we think of empowerment of women and girls. Just because girl power has the

word girl does not mean boys can't be involved. With this everyone is allowed to be included in girl power.

One way we think more people can get involved with girl power is by looking into robotics. When we do robotics you are not only using teamwork you are also building, configuring, and testing robots with your teammates. It is very entertaining because you will get to compete against other schools and while you are competing you can look at other groups robot designs. It is fun because you get to meet new people and make more friends. The most rewarding part of it all are the relationships you make, and the applauds and trophies you win as a group . To include more girls

and others in girl power we can include fun websites to use such as, robotify.com, and Vr.vex.com. In coding class we used the website vr.vex.com. We are assigned coding challenges and receive explanations on how to use the program. Now in coding class we use a program named robotify.com, here we are also assigned a challenge to complete and sometimes when we can't figure how to do it, we are allowed to ask classmates and our teacher. We have done many projects throughout this school year. For example, we have controlled a robot on the programs to move and complete the quest we have to achieve, learned to code, and complete challenges using strict criteria

Another way to include more people with girl power is, to have fun activities, to be used when people are feeling bored. For example, board games, movie days, and field trips to places we have never been to, will allow more people to join. This also helps when you are feeling lonely or upset. You will have people to hang out with from the people you meet inside robotics. That is why robotics not just improves your learning but also improves in our social skills like communicating with other students inside of robotics. I feel like many students would enjoy having these different activities and would want to be included with something as fun as robotics. We can bring more students attention by showing off the past projects we've done like, "Think Outside Of the Box Photography Challenge, The Career Readiness Presentation, and The Career Readiness Paragraph that also may convince more students to join robotics. Maybe by showing the way we treat each other inside of robotics may bring some student attention and make them feel like they will be able to feel like they are in a safe Environment to speak on whatever they have

"A Girl SHOULD BE two things: WHO AND WHAT she wants"

an opinion on. They are able to speak on and the rest of the student show respect while their speaking and be able to conclude on their advice they have for anybody and say their opinion to help each other out.

To conclude, "Girl power" would be a fun way to bring people together. And, to tell people how important and exciting it would be to join our team. Like telling the different reason on why it's fun to be included in something as fun as robotics and why it would be important and exciting to be involved with girl power with the different fun activities we've mentioned and could get more people to consider being in "Girl Power" and boys without worrying about the name "Girl Power". Also, be able to have fun with each other while showing good actions to each other like showing respect, including everyone, and begin fair with each other.
