

This picture of a battery reminds me of robotics because in competitions you need to be as energetic as you can. Also, your projects need to be charged because if they aren't you're in trouble. These challenges are very important to my teacher so I have to make the best of it and all of our teams. There's money on the line you know. The money is going to the school though but it's still really cool. It's crazy to me that a picture of a battery could help me and our school computer lab. That is why this picture reminds me of robotics.
