

We help dogs learn new tricks, but did you know dogs teach us to? Computers are meant to teach us how to do things but us humans are the ones who update and create new information for the computer. This emotion is wisdom. It is the knowledge of how far we have come with technology.

My dog is always there for me when I lack a friend. Technology is always there for me when I lack information. I guess dogs are kind of like computers, and they have both evolved in many ways. Humanity has updated the system of computers and bred various dogs. Mankind is the creator of both topics that lead back to help humans in wisdom as we continue updating and making new discoveries.
