

I chose this picture because it is a picture of me driving our team robot last year. It was really fun and that is why I am doing it again this year. One of my friends is with me and we are on the same team this year along with another friend. My other friend made it to states. After every competition we had to tighten all the screws. I was very glad I did it. I joined a little late but I still had lots of fun! I am proud of our team and that is why I will do it again next year!
