

Women in power

Women Independence By Julisa:

When I hear the phrase girl power I think of when a girl or girls have power and stick together to make something happen. For example, like in the past when women fought for their rights. This was a powerful movement that happened. This relates to robotics because girls are always a huge help, organized, and powerful like the phrase. Now I'm not saying that boys aren't any of those things. Boys can also be powerful, but women are often overlooked.

Girl Power can also be a girl having independence. Having independence is great because in the past girls didn't have the option to be independent, or free. Women were always under men's control. After the women rights movement, women were able to vote, and that's when we became independent. The pain and struggle women went through just to get simple rights and independence was a long and hard journey to complete. Even today, women are still fighting to receive the same rights as men. For example, we have only had male presidents and women still don't have equal pay. This can relate to robotics by girls taking a bigger step and being more of a leader instead of just sitting and watching the work be done.

Women Justices

By Adriana Mazariegos

When I hear the phrase girl power I think of women's rights and justice. In the past women were treated badly by male. Women were fighting for their rights and respect. Women are very powerful and caring, some women are very supportive with each other. Some men think that women are hopeless and useless and they also think that women should not make rules and not have respect. Some men think that women should not lead because they think they are more powerful than women. Women and men are the same just as men are males and women are females. Women are humans they should include the right to live free from violence and discrimination to enjoy the highest attainable standard of physical and mental health; to be educated; to own property; to vote and to earn an equal wage.

women's rights movement over many years, women and girls around the world are still married as children or forced in labor. There is no access to education and political participation, and some are trapped in conflicts where rape is perpetrated as a weapon of war. Around the world, deaths related to pregnancy and childbirth are very high, and women are prevented from making

deeply personal choices in their private lives. Human rights is working toward the realization of women's empowerment and gender equality, protecting the rights and improving the lives of women and girls around the world.

**When
women support
each other,
incredible things
happen**

Women Support each other By: Ashley Lopez

When I hear the phrase girl power I think of girls coming together to help each other. Girls around the world help each other to make them feel better and more confident. Use girls should always be helping each other, not only should girls be helping each other they should always respect one another. For example, In 19th century women suffered, women did not have legal rights other than voting, they were treated badly. Women were also treated like slaves, but when women were tired of how they were treated. Women decided that it was time to change things around the world.

Women around the world have come together and begun protesting for women rights. Women were treated badly in the past, but women and young girls are still treated with no respect now. Many people in the world think that women aren't strong enough to do male jobs or activities. Which is why young girls and women aren't allowed to attend anything that they actually want to do in the future. For example, young girls and women "aren't supposed to be into sports", or women are only meant for home jobs. This relates to robotics because it shows you that girls are stronger together and they are stronger than you think. Girls can face challenges to.
