

“Keep Calm and Write On” by Jeanelle Reyna

With the world being as crazy and inconsistent as it is now, working on our engineering notebook gives me an opportunity to relax, and let all of my worries melt away. Even though this year is different this notebook gives me the same joy I feel every year and connects me to seasons past, while still honing skills for the future. The notebook brings me a sense of consistency and I am thankful to have robotics in my life as it always reminds me to “keep calm, and write on.”
