### **Building And Thinking On A Budget**

This photo shows teamwork, productivity, and creativity, as our team members have split themselves up into groups to divide and conquer. Our team was also creative as we decided to make our own towers, due to a small budget during the COVID-19 Pandemic. In addition to the small budget, our team also had a shortage of parts, as the school was closed. However we persevered and were able to make a successful robot and a successful set of towers.
