

My Vr experience can be summed up to this picture. This picture shows what my vr experience due to the Covid 2020 Pandemic. No one saw the pandemic coming it took everyone by surprise. For a while I thought that there was not going to be any school until the pandemic ended. The reason why I choose this picture I had to these lessons for my robotics class some where easy and some I where hard like the spiral assignment but it let me critically think and experiment with the other iteams that where available there to finish my assignments.
