

This photo displays a culmination of our hard work and dedication competing against not only our opponents but COVID-19. After days of work through zoom, we completed a robot that we were genuinely happy with. We understand that this is just the beginning, and there is no promise that it will become any easier. Shortly after the picture was taken, we went on to the semifinals of this competition, a nice reward for all our hard work. We hope that our endeavors in robotics will continue even in these challenging times, allowing us to improve our STEM skills.
