

From the Ground Up:

This is a photo of 82050A's robot from the 2020 season before going into lockdown. Despite unprecedented circumstances, our team managed to accomplish many extraordinary things such as ranking top 35 in all of the events we competed in and qualifying for provincials for the first time. The team really came together last year to create the best robot possible despite all the hardships that we had to face, in the end we were able to persevere. This robot was built from the ground up, representing teamwork, determination, resilience and creativity from our hardworking team.
