

Although robotics has many ups and downs, I still embrace all aspects of it. Each letter on the A-Z keyboard corresponds to a word beginning with that same letter (on colored label) that represents/describes robotics from my perspective. My hand is about to hit the letter "G" on the keyboard to finish the pangram, "The quick brown fox jumps over the lazy dog", showing that I am typing. Each letter in the pangram represents my corresponding word on the colored label. The pangram is in a heart to represent me loving both the positives and negatives of robotics.
