

Robots fight Coronavirus

RoboPower

36637A

COVID-19

* A video showing our **protected** daily life at work

- 1- The robot measures **human's temperature** to allow him to enter.
2. The robotic gate allows you to enter **after** measuring temperature, if it seems good.
3. **AI** technology was used to **detect** wearing masks.
4. The robot **sanitizes** the place continuously.
5. Automatic hand sanitizer was used to **sanitize** hands during work.
6. **Safety glasses** were used at work.

We seek to serve the community by creating an integrated system to protect our daily life.

Watch and enjoy!

A world map is centered in the background, rendered in a light blue color. Overlaid on the map is a network of white dots connected by thin white lines, representing a global communication or data network. The dots are placed at various geographical locations, and the lines connect them, creating a web-like structure across the continents.

THANK YOU
