(BHS, NanoRaiders, Team 60440 - A)**

Optional Statements:

Include a short statement in English of up to 50 words describing what we see in the video and explaining your intent to the judges. Note that your submission can still be selected as a Finalist if you choose not to write a statement.

Ans:

Role of technology in education during COVID-19 lockdowns is more pronounced. For STEM-robotic outreach activities, many under-privileged students needed access to digital devices. Lack of devices should not deprive others from these activities. Provision of remote digital devices is first and foremost in bridging the STEM-robotic divide. We formed a team, raised funds, supplied devices nationwide for STEM-robotics outreach in communities nationwide and created a visible positive change in communities.
