

# Awkward Cats Inspiration Presentation

Hi we are the Awkward Cats, team 1069K! The members of the Awkward Cats are Piper, Milo and Indira. We are from Berthoud, Colorado. This is our Inspiration Presentation for the poster Online Challenge.

This is how we did our design process for the poster. When we think about robotics we think of our friendships we made through VEX and that continue through real life. We made an acrostic poem and the main word is friendship. We sat together and brainstormed ideas for each letter. For each letter we did a word that describes robotics. We included photos that show friendship in and out of robotics and that of our mentor team, 1069C.

The bottom of our poster describes what you get to experience in robotics. We thought that these pictures would encourage people to join robotics. Some of the best things about robotics is meeting new people around the world and our team getting stronger in many ways. We also wanted to show how coaches and mentors are here for support, motivation and making connections with the students.

In conclusion, We hope that this presentation will inspire people to join and support VEX robotics.
