# The Rescue

Early in the morning on May 22, 2021, the peaceful city of Neutralsville got word that a hurricane was heading straight in their direction. This news was worsened by the fact that Neutralsville had no shelter against the oncoming storm.

However, the citizens of the neighboring cities beside Neutralsville, Redsburg and Bluesborough, felt sympathetic toward Neutralsville and decided that it was their duty to help clear the Neutralsvillagers out of the path of the hurricane.

## The Neutralsvillagers

With the hurricane two minutes away, the citizens of the two cities headed out to rescue the Neutralsvillagers. Unfortunately, they soon realized that their lack of training was affecting their ability to properly save Neutralsville (*This represents the Autonomous Period*).

Luckily it was then that the first responders of Redsburg and Bluesborough arrived at the scene.

With their experience and training, it took the first responders very little time to evacuate Neutralsville. However, once all the Neutralsvillagers were equally split and safe in each of the cities, the two cities began to distrust the other city's safety precautions. They foolishly began to take safe Neutralsvillagers away from the other city and back through the path of the hurricane to their own city! *(This represents the Driver Control Period and the conflict that goes on between the two teams)*

The first responders of Redsburg and Bluesborough understood that the people of Neutralsville did not want to lose their possessions to the hurricane. So as they took the Neutralsvillagers back to the city of Bluesborough, they picked up their belongings from Neutralsville and allowed them to take back as many as they could carry. *(This represents filling goals up with rings during a match)*

However, as the hurricane came closer and closer, it slowly became stronger and stronger. This caught the attention of Redsburg and Bluesborough, who began to think that the Neutralsvillagers would not be safe enough on the ground, and would be safer higher up. Because of this, each city designated a raised shelter in each of the cities to house both the people from Neutralsville, *and* the residents of that specific city. *(This represents stacking goals on the platform)*

With thirty seconds until the hurricane arrived, the cities were not willing to risk the safety of the Neutralsvillagers

**A First Responder**

by taking them away from the other city's shelter and back through the path of the hurricane, so they worked on making those in their own city as safe as possible. *(This represents the last thirty seconds of a match when teams are not allowed to touch their opponents platform)*

As the hurricane came through, it fiercely ripped through Neutralsville and damaged several buildings, but it was unable to hurt any civilians due to the work of Redsburg and Bluesborough.

Even though both cities worked hard to save Neutralsville, one city rescued the most people and saved the most lives. This city will gain more citizens and wealth than the other because of the safety of their city. The name of this city is...

...Bluesborough!!!!!!!!!!
