Location: Richfield, OH

Description:

Created by following the steps of the design process, my poster features a picture of my team, some text, and the Vex Robotics logo. The problem of this online challenge was to make a recruitment poster that inspires others to join Vex Robotics. I conducted research on features of recruitment posters and then brainstormed ideas for my poster. After creating the first draft, I had my peers review my work and then improved it to make the final product.
