

Welcome to VEX IQ Robotics

VEX IQ robotics provides opportunities for students to code, build, drive, and even compete in tournaments with robots. You can join VEX IQ Robotics through the Pike County Schools STEM program. The word STEM stands for Science, Technology, Engineering, and Mathematics.

As a participant in the STEM program, you can meet people from other schools, learn how to code many devices, use apps like Scratch and so much more! STEM and VEX give students an amazing chance to apply Science, Technology, Engineering, and Mathematics knowledge to robotics and have fun learning at the same time!

Join VEX Robotics Today

To find out more information about the STEM program, call **334-566-5396**, or visit **ca31.com**.
