

Pike County School's Poster Challenge

Team Members: Trent, Loc, Anicka, Noelle, Alayna, and Laney

Team Name: Atom Alliance

Team Number: 56445A

Location of Team: Troy, Alabama

Poster Description:

This poster gives you a brief description on why you should join the Pike County Schools STEM program and VEX IQ robotics. First, I decided to use Canva to create our team's poster. I looked through the different layouts that I was going to use for the poster. I decided on the layout that was most tech like. Next, I thought of what to write, and while I was writing I found some cool pictures to put on it. After I was done, I shared it with my teacher and she showed me how to improve it. The things she told me to improve were to make the spelling better, to add a QR code, and to put real pictures, like things in our classroom and robots. That's how I used the engineering design process to create my team's poster.
