VEX ROBOTICS

helps students to develop teamwork, critical thinking, project management, and communication skills required to prepare them to become the next generation of entrepreneurs, innovators and problem solvers.

VEX Robotics helps students to realize their passions and interests.

VEX Robotics will teach students how to learn and implement different technologies.

VEX Robotics helps students in community involvement and socializing with others.

I joined VEX Robotics because I was interested in building robots and I am so glad that I did. VEX is an easy way to learn robotics with a community of people who all want you to be successful.
