

Vex Robotics Poster Design

When designing our poster, we considered many things. We made it look appealing so people would like the poster and take the time to read it. Color is a very useful tool to making it look good. We also put a very large "Join VEX Robotics" in the middle of our poster so people immediately notice and read it. Finally, we listed things you will do in robotics around the outside. We finished by writing "and more" to show that you will do many amazing things in VEX Robotics!
