

#GirlPowered

Our poster is our vision of what a Girl Powered team is made of. We began by looking at all our pictures and picked the ones we felt meant the most to us and showed us the awesome parts of VEX Robotics. Then we did a word dump where we each wrote all the words that came to mind when we thought about our robotics club. Once we were done, we compared each other's words and picked the ones that meant the most to all of us. We decided to use Canva to create a digital poster we uploaded all our pictures and made the important ones bigger. Then we typed in all our words and made them different sizes based on how strong we feel about them.
