

BUILD REAL ROBOTS
HAVE REAL FUN
LEARN REAL SKILLS

VIRUS MCCC is a student-centered competitive robotics team. We design, build, and program robots to compete in VEX U, a competition with more than 300 teams internationally. We are looking for designers, builders, programmers, drivers, and team managers. The community program is open to all college-level students.

Team members will acquire valuable engineering, computer programming, and soft skills for free.
