VEX Poster Design

Design Choices

For this poster, Rucha and Mahi held a meeting to discuss what we wanted our poster template to look like and the color scheme we wanted to use. We decided to go with a lavender and white theme as it is our color theme for our Instagram and Facebook page for this season. We wanted to create a poster where we discuss a bit about the different positions we have available, the different qualities that students have that can help them succeed in our team, and a bit about the way our team functions.

We wanted specific focus on the people on our team, which is why we chose to display images of them working. Our non-toxic and friendly team environment allows everyone to thrive and provide their best to the team. The outline on the people draws the viewer's attention, placing special emphasis on them and the work that they are doing.

The lowercase on the poster creates an inviting atmosphere that allows the reader to relax; this team is not meant to be overly intense, but is instead meant to be a lovely environment where the members can grow into the best people they can be.

team 97101w

we are recruiting!

are you:

- a problem solver?
- innovative?
- creative?
- passionate about stem?
- longing for a non-toxic environment with fellow passionate girls?
