

2022 Poster REC Challenge 7983E

Titan Williamson, Brooklyn Gal, Skyler Lopez, Campbell Cleveland, Peter Hay, Kameron Graham

When designing the poster we wanted to include photos of our robot and what the field looks like during competition to show what you would experience while participating in VEX robotics. We also included a list of all the roles you could do while on a robotics team to show all the different experiences that you could do and learn what you may like to do. While coming up with our design, we decided we wanted to provide information on how VRC can help students and teachers and how students, teachers, judges, and donors can support their local VRC program.
