

44691X: Blue Heat Cover Page

Team 44691X: Blue Heat comes from Wooster Ohio, United States. The team is made up of five students, Garrett Long, Tyler Massoni, Mark Wood, Antonio Reyes, and Jacob Yost. Our team roles break down as such, Garrett is one of our Builders, Tyler is our Coder, Mark is our Notebooker, Antonio is our other Builder, and Jacob who is our Driver. We all attend Wooster High School in Wooster Ohio and commute everyday and even come in early and stay late to get what work we need to do. We work hard as a team and communicate constantly to be an effective team. Our poster was created in Google Drawings, which can be a limiting program with a few issues, but it was the only option with us where anyone had any experience using it. That would lead to some pixelation as downloading would compress the image to the ends of the earth and into space, but that wasn't so bad as we manually tweaked the rough size in Google Drawings and then manually cropped and upscaled the image in Gimp to the desired parameters. This may result in some odd quality, however it was the best we could do as our team was getting sent home one by one with each person getting exposed to Covid. However we are proud of the final product and are overall glad we took on the challenge.
