

Recruitment Poster Design

VEX/REC 2021-2022 Online Challenge

Team: Robotics Royalty (#17961A)

School: Twin Rivers Middle School, Buford GA

Participants: Ella Wilson, Misha Gandhi,
Sophia Brown, and Gabrielle Watkins

When we first began brainstorming ideas for the post, it was evident to everyone on our team that we needed to highlight the benefits we've personally experienced from VEX. We each were exposed to different opportunities and indulged in catalysts for future careers. This inspired the slogan, "Launch your future". Programs like REC and VEX don't do the work for students but they do create a foundation that can be continually built up. This 18*24 poster created on Procreate and Canva represents the advantageous impact Computer Science programs can have on students of all ages.
