We want
YOU!

Our Team!!

"There are an Endless number of things to Discover about Robotics. A lot of it is just too **F**antastic for people to **B**elieve."
-Daniel H. Wilson

Our Experiences

- This is Nick Arcia and my favorite situations are the ones that get you thinking, like when we come across big questions, this causes the team to brainstorm ideas, I find this to be one of the many wonders VEX robotics has to offer.
- I'm Christopher and I'm going to tell you that Robotics that will help develop your mindset. Robotics brings a world for you to see, it helps you have your own ideas and imaginations come to life.
- Hi, my name is Sebastian Antan and my experiences in VEX Robotics consist of my whole team brainstorming with each other, creating/designing one major prototype so that it solves the problem statement, and of course, building the final design which is always the fun part!
