

# Building The Future

Participating Students: Christian, Arantza, Angela, and Xiomara.

Team Number: 18462A

Location of Team: Eugenia B. Thomas 5950 NW 114th Ave, Miami, FL 33178

The poster was created with colored pencils and alcohol markers. It's meant to be read clockwise and a lot of thought went into the position of the words. For example, the poster can be read as "We are VEX Robotics" as well as "VEX Robotics: \*list of activities\*". And the main message of the poster also contains a paronomasia of sorts. We are "Building The Future" of technology, as well as "Building The Future" through education. Since robotics education is informing the students who will make up the future.
