

# GIRL POWERED

DAMIAN, AVA, LUKE, AND CARLOS

418F

GALVESTON, TEXAS

# AVA REYES

Hi, my name is Ava Reyes I'm in 8th grade and I'm the only girl in my robotics team. I love to dance, sing, and hangout with my friends. I've been dancing for 9 years i've been competing for 6 years. I love fashion it's something that's fun to me. A lot of people look at me and are like "wow!, you do robotics?" and my answer is yes lol! I don't have a lot of the brains but i bring my group a lot of beauty!

# DAMIAN ORTIZ

Hi, my name is Damian I'm in 8th grade and I love baseball. I've been playing baseball since i got practically walk! It's my dream to be in the MLB and have a very successful baseball career. I love robotics because it's a way of using parts that you never knew you could do and just create new things everyday !

# LUKE PEREZ

Hi, my name is Luke i'm in 8th grade I love robotics and I love dogs. robotics is very fun with not just the building but the coding and other fun challenges! My goal this year is to make it to worlds and I have faith we will get there!

# CARLOS JIMENEZ

Hi, my name is Carlos i'm in 8th grade and I love robotics. I think of myself as the comedian in the group, if our team is having difficulties with a certain thing i'm always there to crack a joke!!

# What Girl Powered Means To Us

Girl powered to us means women taking control and having a lead in things besides men. We obviously have men on our team but the one girl on our team works just as hard as the men in our group.

# Our Team Roles

The roles we have on our team is a key to success. We all need to learn each role so if there's ever an emergency with an important team member we have a backup plan. It's also good just in general to learn each role because we all need to learn new things.

Damian's Role: Driver

Ava's Role: Recorder

Luke's Role: Builder

Carlos's Role: Play Around

# Team Chemistry

Our team is very hardworking and we all get along. We make it fun and educational as we learn new things everyday! There's always good communication between everyone in our group. Of course there's gonna be times where we might not agree on something but the best way to solve that is to compromise and talk it out.

# Diversity of Perspective

our perspective as a team is to work together and compromise instead of fighting and not getting through anything. We would really love to make it to states because not just to travel but our group is really dedicated to robotics.

# Stem Role Model

Mark Zuckerberg is the founder of Facebook. He is a very rich and successful man. He inspires our group because from the technology work he has done and the way he has made one of the top used apps in the world is crazy. Mark is still successful today with Facebook and is making so much money by the minute. He will always be our groups role model from the success and money hes made.
