

Team Titan Poster

Team Members: Aly, Christian, and Divya

Team: 31887A

Davie, Florida

Hello, we are Team Titans. Our passion for Engineering started in 3rd grade. We joined the Engineering Club for fun, but after the first year of the club we figured out our future careers. The past and current club had a huge impact on us because we got to build, make new friends, and learn engineering skills. This is what inspired the members of our team and these are the reasons for our recruitment poster. We want people to be inspired like we were and explore VEX Robotics through the Nova Middle Engineering Club.

The poster was designed collaboratively using Canva and IbisPaintX.
