

VRC Middle School Poster Online Challenge

The Sky is the Limit

Team: 842T

Names of Students Participating: Chloe, Arya, Lily, Diya, Aanya

Location of Team: Chester Springs, PA

Description:

This poster was made to show the great opportunities and learning experiences Vex Robotics offers to students of all ages. The pink outside represents the physical workshop and where they convert their ideas into reality while the bluish sky part represents the ideas in your mind; that *the sky's the limit* on what you can make your robot. This poster was created to inspire the next generation of people to use their imagination and logic to innovate and create new ideas and concepts, offering an opportunity to educate and compete in robotics. We made this poster by first painting the basic design on a canvas then converting it digitally to Sketchbook and ProCreate. Then we added drawings and words.
