This poster is a colored persuasive board with lists of skills learnt in VEX and team jobs you can take. The purpose of it is to inform people about VEX and to persuade them to join.

First I Sketched out my design with printer size paper and asked my team to point out areas of improvement.

Then I used colored pencils and markers to see which would appear more vivid and grab attention.

When I was done with that I checked with my team for opinions and tips

Finally I designed the Poster board and checked with my team one last time.
