

Theme It Up

*Team B;
Autumn and Luna*

We are the Gear Bear of Los Feliz
STEMM Magnet. We give Robotics
"Pitching In" a welcome.

For our theme, we decided to choose a bee theme. Our robots are the bees while the players are the beekeepers. The balls you need to score are the pollen.

Theme

For our point system, each pollen ball put in the low hive (low goal) will be rewarded with two pouches of honey. If a “bee” manages to put a pollen ball in the high hive (high goal) will be rewarded with 6 pouches of honey. Each starting corral of pollen cleared will be given 5 pouches of honey.

Point System

*Each bee will try to hang on either a low flower or high flower.
Each hang on the low flower gives 6 pouches of honey for the
beekeeper. Meanwhile each high flower hang is 10 pouches of honey
for the beekeeper.*

*Low
Flower*

High Flower

Hanging System

Other players will be identified as bees from the same colony. Both bees will have to work together in order to make enough honey.

Other Players

Thank You For
Watching Our
