

Vex IQ Poster Design

Online Challenge

This is our Vex IQ Online Challenge poster. It is about recruiting students or adults for NWMS Robotics and how it is for anyone, which is something I love about it. If you love to write or draw or do photography, you can be on documentation. If you like to build or engineer, you can be on our build teams. If you like to drive drones or do anything with a controller, you can drive. If you like to code or work with computers, you can program. Robotics holds countless positions for anything a student could want. An adult can coach, support, etc. Vex Robotics is perfect for almost anyone. It helps people with social skills, problem solving, creativity, etc.
