

Title: The Face of Robotics

Team: 10404D

Team Members: Kiana, Asher, Nyla, Brody, Ryleigh, Xavia

Team discussed ideas and Kiana was artist in charge of creating the image on Paint Tool program

Location: Indianapolis, IN, USA

Description:

The poster is an image of a child, could be male or female. We wanted it to be "any kid". We put the words: Creation, Teamwork, and Friends. These three words are the things we find most fun and rewarding about robotics. We enjoy winning, and we like playing, but mostly we like the creating of the robot and working together as a team. We know that this image is not of a robot, or of a VEX game field, we wanted it to be about what robotics is about, and that is students and what we get from being on our robotics team.
