# Girl Powered

By: Raneem, Theresa, Kate, Violet, and Emily

“Girl Powered”, when someone says this, we might think different things but one thing that stands out to us is “Powered by girls”, “Done by girls”, or things that girls did that the society didn’t expect us to do. Some people think differently but a lot of people will sometimes say that a girl cannot do a job that consists of mostly guys. Although people might have done something different at solving a problem for their job or even a design, they might have ended with the same or better result. Our school’s robotics teams all think differently with strategies and ideas and they still come up with amazing robot and notebook designs. Our robotics team is the only all girl team at our school. This reflects on our team’s approach to robotics because we can all understand and we feel comfortable around each other. We could use phrases and show representations that may be hard for a guy to follow along and understand.

Our team has a great group of people. We have Emily, who is the notebook manager and the co-captain, and Theresa who is the programmer. These two are always talking about something and playing around but they still make sure they get their work done. They give great entertainment, and they are fun to be around. We have Kate and she is the thinker. She is always coming up with new ways to score points and scouting sheets to use at the competition. Raneem is the builder, and she makes sure we are having extra meetings to finish the robot. She also keeps track of everything that we are doing. Violet is also the builder and the other co-captain, and she makes sure everyone is on task and that the robot works the way we want it to be and that it works right. In conclusion, we have a great team that makes robotics exiting.

Even though our team members have different roles we all are interested in other roles. Just because one of us is a builder doesn’t mean we don’t communicate with the rest of the team. We all try our best to sometimes switch the roles up a little. Sometimes Theresa will help Raneem and Violet build and vice versa. This helps our team because it makes sure everyone knows what is happening with the team.

A different perspective can change everything. It can see flaws you didn’t see, have ideas you haven’t thought of and even teach you something you didn’t know. Sometimes people forget the importance of another perspective. Without another opinion you can miss crucial flaws or details. In our team we all help each other and communicate. If we see or come up with something later, we email each other. Without the ideas and feedback, we give one another one thing’s for sure - we wouldn’t be even close to where we are now.

Our team is hard working, kind to each other, and we are inspired to be great builders, programmers, writers, and more. A role model who inspires our team is our Coach. Coach Rhodes helps our team to strive for the best and always helps us with any questions we have. Everyone on our team looks up to Coach Rhodes. She inspires us to be more in life then what society expects us to be. She also inspires our team to never give up and strive for success. Our team has a great robot, program, and notebook because we keep in mind what Coach Rhodes has done for us and what she has taught us.
